Elsevier Sequoia

Subject Index of Volume 62

Aluminum
  photovoltaic and photoconductive properties of aluminum/poly(*p*-phenylene vinylene) interfaces, 265
Anisotropy
  anisotropy of thermoelectric power of stretch-oriented new polyacetylene, 253

Biphenyl
  spectroelectrochemical study of polyphenylene by *in situ* external reflection FT-IR spectroscopy. I. Polymerization of biphenyl, 125
Bis(ethylenedithio)–tetrathiofulvalene
  characterization of the surfaces of the conducting salts α-(BEDT-TTF)$_2$X (X = I_3, IBr_2) by scanning tunneling and atomic force microscopy, 83
  a photoemission study of *c*-axis-oriented thin films of α-(BEDT–TTF)$_2I_3$, 187
  structure of new organic superconductor κ-(d$_8$-ET)$_4$-[$HgBr_2 \cdot Hg_2Br_6$] in the family of κ-(ET)$_4Hg_{3-\delta}Br_8$, 193

C_{60}
  $O_2(a^1\Delta_g)$ production and oxygen diffusion in C_{60} films, 1
Camphor sulfonate
  the role of the counter-ion during electropolymerization of polypyrrole–camphor sulfonate films, 41
Cobalt
  structure and solid-state properties of the stable ring-oxidized conductor $CoPc(AsF_6)_{0.5}$: interaction between ring π-electrons and cobalt d-electrons, 169
Composite
  a conducting composite of polypyrrole. I. Synthesis and characterization, 201
Conduction noise
  further experiments on narrow-band conduction noise in $NbSe_3$, 49
Contact
  electrical properties of very thin heat-treated polyacrylonitrile layers electropolymerized on nickel for contact application, 207
Crystal
  polypyrrole growth on crystalline PEO complexes: characterization by WAXD and XPS, 217
Cyclic voltammetry
  spectroelectrochemical study of polyphenylene by *in situ* external reflection FT-IR spectroscopy. II. Cyclic voltammetry of polyphenylene, 133

Diffraction
  polypyrrole growth on crystalline PEO complexes: characterization by WAXD and XPS, 217
Disilanylene
  electronic structure of polyacetylene systems containing disilanylene, 113
Dopant migration
  dopant migration in conducting polymers, 27
Doping
  structure and properties of deeply Li-doped polyacenic semiconductor materials beyond C_6Li stage, 153
  structure of highly conducting PF_6^--doped polypyrrole, 257
  on the influence of doping on the structure of oriented poly(3-decylthiophene), 273

Electrical properties
  electrical properties of very thin heat-treated polyacrylonitrile layers electropolymerized on nickel for contact application, 207
  synthesis and electrical properties of metallotriazolehemiporphyrazines, 281
Electrochemical characterization
  synthesis and electrochemical characterization of functionalized 3-substituted polypyrroles, 277
Electrochemical cycling
  infrared dichroic studies on the electrochemical cycling of polythiophene, 141
Electrochemical properties
  electrochemical properties of polypyrrole films polymerized in the presence of Methylene Blue, 117
Electrochromic devices
  conductive polyheterocycles as electrode materials in solid state electrochromic devices, 17
Electrode
  conductive polyheterocycles as electrode materials in solid state electrochromic devices, 17
Electroluminescent diodes
  blue electroluminescent diodes utilizing blends of poly(*p*-phenylphenylene vinylene) in poly(9-vinylcarbazole), 35
Electronically conductive polymers
  modification of fluoropolymer surfaces with electronically conductive polymers, 75
Electronic properties
  electronic properties of one-dimensional stacking model of pentacene, 97
Electropolymerization
  investigation of the early stages of the electropolymerization of *o*-toluidine by UV–Vis reflectance spectroscopy, 9
  the role of the counter-ion during electropolymerization of polypyrrole–camphor sulfonate films, 41
  the effect of silanization and poly(ethylene oxide) on the electropolymerization of pyrrole, 55
  electrical properties of very thin heat-treated polyacrylonitrile layers electropolymerized on nickel for contact application, 207
  electropolymerization of silylthiophene monomers: FT-IR and Raman spectroscopy characterization of polythiophene films, 233

Films
  $O_2(a^1\Delta_g)$ production and oxygen diffusion in C_{60} films, 1
  the role of the counter-ion during electropolymerization of polypyrrole–camphor sulfonate films, 41
  anisotropic, conducting films from imide anion radicals and poly(vinyl alcohol) formed by casting, 71
  electrochemical properties of polypyrrole films polymerized in the presence of Methylene Blue, 117

a photoemission study of *c*-axis-oriented thin films of α-(BEDT–TTF)$_2$I$_3$, 187
electropolymerization of silylthiophene monomers: FT-IR and Raman spectroscopy characterization of polythiophene films, 233
Fluoropolymer
modification of fluoropolymer surfaces with electronically conductive polymers, 75

Heat treatment
electrical properties of very thin heat-treated polyacrylonitrile layers electropolymerized on nickel for contact application, 207

Imide anion radicals
anisotropic, conducting films from imide anion radicals and poly(vinyl alcohol) formed by casting, 71
IR dichroic studies
infrared dichroic studies on the electrochemical cycling of polythiophene, 141

Lithium
structure and properties of deeply Li-doped polyacenic semiconductor materials beyond C_6Li stage, 153

Mercury
structure of new organic superconductor κ-(d$_8$-ET)$_4$-[$Hg_3Br_2 \cdot Hg_2Br_6$] in the family of κ-(ET)$_4$Hg$_{3-\delta}$Br$_8$, 193
Metallotriazolehemiporphyrazines
synthesis and electrical properties of metallotriazolehemiporphyrazines, 281
Methylene Blue
electrochemical properties of polypyrrole films polymerized in the presence of Methylene Blue, 117
Microscopy
characterization of the surfaces of the conducting salts α-(BEDT-TTF)$_2$X (X = I$_3$, IBr$_2$) by scanning tunneling and atomic force microscopy, 83
interpretation of scanning tunneling and atomic force microscopy images of TCNQ salts, 159
Model
electronic properties of one-dimensional stacking model of pentacene, 97

Niobium
further experiments on narrow-band conduction noise in $NbSe_3$, 49

Oligomers
ESR and optical spectroscopy evidence for a chain-length dependence of the charged states of thiophene oligomers. Extrapolation to polythiophene, 245
Organosilicon polymers
electronic structures of newly designed organosilicon polymers containing Si–N bonds. Part I, 91
Oxygen diffusion
$O_2(a^1\Delta_g)$ production and oxygen diffusion in C_{60} films, 1

Pentacene
electronic properties of one-dimensional stacking model of pentacene, 97
Pernigraniline
ESR of pernigraniline base solutions revisited, 287
Photoconductive properties
photovoltaic and photoconductive properties of aluminum/poly(*p*-phenylene vinylene) interfaces, 265
Photoemission studies
a photoemission study of *c*-axis-oriented thin films of α-(BEDT–TTF)$_2$I$_3$, 187
Photovoltaic properties
photovoltaic and photoconductive properties of aluminum/poly(*p*-phenylene vinylene) interfaces, 265
Poly(2,5-dimethoxyaniline)
chemical and electrochemical syntheses, and characterization of poly(2,5-dimethoxyaniline) (PDMA): a novel, soluble, conducting polymer, 179
Poly(3-decylthiophene)
on the influence of doping on the structure of oriented poly(3-decylthiophene), 273
Poly(9-vinylcarbazole)
blue electroluminescent diodes utilizing blends of poly(*p*-phenylphenylene vinylene) in poly(9-vinylcarbazole), 35
Poly[*E*-1,2-(2,2′-dithienyl)ethylene]s
synthesis and characterization of alkyl-substituted poly[*E*-1,2-(2,2′-dithienyl)ethylene]s, 223
Polyacenic semiconductor
structure and properties of deeply Li-doped polyacenic semiconductor materials beyond C_6Li stage, 153
Polyacetylene
electronic structure of polyacetylene systems containing disilanylene, 113
soliton spacing in polyacetylene with even carbon-to-dopant ratios, 197
anisotropy of thermoelectric power of stretch-oriented new polyacetylene, 253
Polyacrylonitrile
electrical properties of very thin heat-treated polyacrylonitrile layers electropolymerized on nickel for contact application, 207
Polyaniline
symmetry-specific electron–phonon coupling for electronic states near the Fermi energy of metallic polyaniline: resonant Raman scattering, 107
thermal stability of chemically synthesized polyaniline, 229
Polybicyclo[1.1.1]pentasilane
electronic structure of polybicyclo[1.1.1]pentasilane, polybicyclo[2.2.2]octasilane, polyoctasilacubane and related compounds, 23
Polybicyclo[2.2.2]octasilane
electronic structure of polybicyclo[1.1.1]pentasilane, polybicyclo[2.2.2]octasilane, polyoctasilacubane and related compounds, 23
Poly(ethylene oxide)
the effect of silanization and poly(ethylene oxide) on the electropolymerization of pyrrole, 55
polypyrrole growth on crystalline PEO complexes: characterization by WAXD and XPS, 217
Polyheterocycles
conductive polyheterocycles as electrode materials in solid state electrochromic devices, 17
Polymerization
spectroelectrochemical study of polyphenylene by *in situ* external reflection FT-IR spectroscopy. I. Polymerization of biphenyl, 125
Polyoctasilacubane
electronic structure of polybicyclo[1.1.1]pentasilane, polybicyclo[2.2.2]octasilane, polyoctasilacubane and related compounds, 23

Polyphenylene
spectroelectrochemical study of polyphenylene by *in situ* external reflection FT-IR spectroscopy. I. Polymerization of biphenyl, 125
spectroelectrochemical study of polyphenylene by *in situ* external reflection FT-IR spectroscopy. II. Cyclic voltammetry of polyphenylene, 133
Poly(*p*-phenylene vinylene)
photovoltaic and photoconductive properties of aluminum/poly(*p*-phenylene vinylene) interfaces, 265
Poly(*p*-phenylphenylene vinylene)
blue electroluminescent diodes utilizing blends of poly(*p*-phenylphenylene vinylene) in poly(9-vinylcarbazole), 35
Polypyrrole
the role of the counter-ion during electropolymerization of polypyrrole–camphor sulfonate films, 41
XPS study of conducting polypyrrole–poly(vinyl alcohol) composites, 101
electrochemical properties of polypyrrole films polymerized in the presence of Methylene Blue, 117
a conducting composite of polypyrrole. I. Synthesis and characterization, 201
polypyrrole growth on crystalline PEO complexes: characterization by WAXD and XPS, 217
structure of highly conducting PF_6^--doped polypyrrole, 257
synthesis and electrochemical characterization of functionalized 3-substituted polypyrroles, 277
Polythiophene
infrared dichroic studies on the electrochemical cycling of polythiophene, 141
electropolymerization of silylthiophene monomers: FT-IR and Raman spectroscopy characterization of polythiophene films, 233
ESR and optical spectroscopy evidence for a chain-length dependence of the charged states of thiophene oligomers. Extrapolation to polythiophene, 245
Poly(vinyl alcohol)
anisotropic, conducting films from imide anion radicals and poly(vinyl alcohol) formed by casting, 71
XPS study of conducting polypyrrole–poly(vinyl alcohol) composites, 101
Pyrrole
the effect of silanization and poly(ethylene oxide) on the electropolymerization of pyrrole, 55

Raman scattering
symmetry-specific electron–phonon coupling for electronic states near the Fermi energy of metallic polyaniline: resonant Raman scattering, 107

Selenium
further experiments on narrow-band conduction noise in $NbSe_3$, 49
Silanization
the effect of silanization and poly(ethylene oxide) on the electropolymerization of pyrrole, 55
Silicon
electronic structures of newly designed organosilicon polymers containing Si–N bonds. Part I, 91
electropolymerization of silylthiophene monomers: FT-IR and Raman spectroscopy characterization of polythiophene films, 233
Solid-state properties
structure and solid-state properties of the stable ring-oxidized conductor $CoPc(AsF_6)_{0.5}$: interaction between ring π-electrons and cobalt d-electrons, 169
Solitons
soliton spacing in polyacetylene with even carbon-to-dopant ratios, 197
Spectroscopy
investigation of the early stages of the electropolymerization of *o*-toluidine by UV–Vis reflectance spectroscopy, 9
XPS study of conducting polypyrrole–poly(vinyl alcohol) composites, 101
spectroelectrochemical study of polyphenylene by *in situ* external reflection FT-IR spectroscopy. I. Polymerization of biphenyl, 125
spectroelectrochemical study of polyphenylene by *in situ* external reflection FT-IR spectroscopy. II. Cyclic voltammetry of polyphenylene, 133
polypyrrole growth on crystalline PEO complexes: characterization by WAXD and XPS, 217
electropolymerization of silylthiophene monomers: FT-IR and Raman spectroscopy characterization of polythiophene films, 233
ESR and optical spectroscopy evidence for a chain-length dependence of the charged states of thiophene oligomers. Extrapolation to polythiophene, 245
ESR of pernigraniline base solutions revisited, 287
Structure
electronic structure of polybicyclo[1.1.1]pentasilane, polybicyclo[2.2.2]octasilane, polyoctasilacubane and related compounds, 23
electronic structures of newly designed organosilicon polymers containing Si–N bonds. Part I, 91
electronic structure of polyacetylene systems containing disilanylene, 113
structure and properties of deeply Li-doped polyacenic semiconductor materials beyond C_6Li stage, 153
structure and solid-state properties of the stable ring-oxidized conductor $CoPc(AsF_6)_{0.5}$: interaction between ring π-electrons and cobalt d-electrons, 169
structure of highly conducting PF_6^--doped polypyrrole, 257
on the influence of doping on the structure of oriented poly(3-decylthiophene), 273
Superconductor
structure of new organic superconductor κ-$(d_8\text{-ET})_4[HgBr_2 \cdot Hg_2Br_6]$ in the family of κ-$(ET)_4Hg_{3-\delta}Br_8$, 193
Surfaces
modification of fluoropolymer surfaces with electronically conductive polymers, 75
characterization of the surfaces of the conducting salts α-$(BEDT\text{-}TTF)_2X$ ($X = I_3$, IBr_2) by scanning tunneling and atomic force microscopy, 83
Symmetry
symmetry-specific electron–phonon coupling for electronic states near the Fermi energy of metallic polyaniline: resonant Raman scattering, 107
Synthesis
chemical and electrochemical syntheses, and characterization of poly(2,5-dimethoxyaniline) (PDMA): a novel, soluble, conducting polymer, 179
a conducting composite of polypyrrole. I. Synthesis and characterization, 201
synthesis and characterization of alkyl-substituted poly[*E*-1,2-(2,2′-dithienyl)ethylene]s, 223
synthesis and electrochemical characterization of functionalized 3-substituted polypyrroles, 277

synthesis and electrical properties of metallotriazolehemiporphyrazines, 281

TCNQ
interpretation of scanning tunneling and atomic force microscopy images of TCNQ salts, 159
Temperature-dependent behavior
temperature-dependent behavior of conjugated polymers in solution, 61
Thermal stability
thermal stability of chemically synthesized polyaniline, 229
Thermoelectric power
anisotropy of thermoelectric power of stretch-oriented new polyacetylene, 253
Thiophene
ESR and optical spectroscopy evidence for a chain-length dependence of the charged states of thiophene oligomers. Extrapolation to polythiophene, 245
Toluidine
investigation of the early stages of the electropolymerization of *o*-toluidine by UV–Vis reflectance spectroscopy, 9
